PROJECTS

Virtual Trading Platform

📅 February 2023 - May 2023

📍 [GitHub Repository](#)

- Designed and implemented a fully functional Virtual trading platform website using **HTML**, **CSS**, and **JavaScript**, with a user-friendly interface to simulate stock trading activities.
- Utilized **Node.js** and **MySQL** to develop the backend of the platform, enabling seamless data handling and real-time transaction processing. Fetched Real time Stocks data from **API**.
- Users can buy, sell, and set automated buying/selling based on desired prices. The platform displays graphical stock price history implemented using **Chart.js** a javascript library.
- Deployed Link** [↗](#)

Technical Non-Technical Portfolio Management

📅 February 2023 - May 2023

📍 [GitHub Repository](#)

- Designed and implemented Technical Non-Technical Portfolio Management website using **HTML**, **CSS**, and **JavaScript**, with a user-friendly interface.
- Co-authored Backend Using **Node-JS (Express)** And **MySql** For Smooth Data Handling.
- Admins can add, delete users, update grades. Privacy options available.

Personal Portfolio

📅 December 2023

📍 [GitHub Repository](#)

- Combined **React** and **3js** for a visually dynamic portfolio, offering an immersive showcase of skills and personality.
- Crafted a structured presentation showcasing diverse tech skills, demonstrating expertise across various stacks and frameworks.
- Integrated a user-friendly email feedback system, fostering engagement and reflecting a user-centric design approach.

COURSE WORK

Data Structures and Algorithms

Object Oriented Methodology

OS

DBMS
