EDUCATION

Indian Institute of Information Technology, Allahabad

B.Tech in Information Technology (IT)

2021-2025

CGPA: 8.04

EXPERIENCE

Paytm Money

Software Engineer

June 2025 - Present

Noida (Onsite)

- Built an **Asynchronous Kafka**-based notification pipeline for SIP PDN(Pre Debit Notification)/DN(Debit Notification), reducing **latency** from **300ms** to **200ms** while processing **100k+** events/day.
- Developed a **Kafka-driven asynchronous** system for bulk mandate failures via CSV-based APIs, resolving incorrect SIP linkage for **100k+** dormant mandates and ensuring data consistency across PG and internal databases.
- Developed a scalable **RESTful** API using **Java** and **Spring Boot** to fetch and categorize mandates across up to 4 linked bank accounts, moving parsing logic to the backend and improving page load performance by **30%**.
- Leveraged **Redis** for low-latency analytics and event tracking, and automated scheduled workflows using **Rundeck** cron jobs to support PDN/DN processing and monitoring.

Paytm Money

Software Engineer Intern

Jan 2025 - June 2025

Noida (Onsite)

- Developed search feature using **ReactJS**, **JavaScript**, and **SCSS** implementing debounced search, autocomplete, real-time filtering, and category navigation with **RESTful API** integration to reduce fund discovery time.
- Built Discover module leveraging **React Hooks**, **Context API**, and custom hooks with reusable functional components, dynamic data visualization, and responsive **CSS/SCSS** for enhanced mobile experience
- Optimized frontend performance using **React.memo**, lazy loading, code splitting with Webpack, and Context API state management, improving page load times and overall application responsiveness

PROJECTS

Patient Management System Github | [🔗](#)

Java, Spring Boot, PostgreSQL, gRPC, Kafka, Redis, AWS, Docker

- Developed a **Microservices** based healthcare platform with **Spring Boot REST** APIs for patient **CRUD**, a **gRPC** billing service using **Protocol Buffers**, and **Kafka**-based event streaming for asynchronous patient lifecycle events to analytics and billing services.
- Implemented an API Gateway as the single entry point with **JWT** authentication and **Spring Security** for user registration/login, route filters, and centralized exception handling across patient, auth, and analytics microservices.
- Provisioned **AWS** infrastructure with **CloudFormation** (VPC, RDS, MSK, ECS), containerized microservices with **Docker**, and validated deployments using **LocalStack** and integration tests.

Court Booking System [🔗](#) | Github | [🔗](#)

React.js, MongoDB, JavaScript, NodeJS, Express.

- Developed a full-stack sports court booking system using **React**, **Node.js**, and **MongoDB**, allowing users to book courts for various sports at multiple centers with real-time availability validation and time conflict handling.
- Implemented secure user authentication with **JWT** and created **RESTful APIs** for managing user data, sports centers, courts, and booking functionalities, ensuring seamless interaction between the frontend and backend.

TECHNICAL SKILLS AND INTERESTS

Languages: C, C++, Java, Javascript, Python, SQL.

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data, React, Node.js, Express.js, REST APIs, gRPC

Databases & Messaging: MySQL, PostgreSQL, MongoDB, Redis, Kafka, RabbitMQ, Elasticsearch.

Coursework: DBMS, OS, DSA, CN, ML, OOPS, System Design, Distributed System, Design Patterns.

Tools & Cloud: Docker, AWS (S3, EC2), Linux/Unix, Git, CI/CD, Maven, Grafana, Kibana, Postman.

AI: Prompt Engineering, AI-Assisted Development (Cursor, GitHub Copilot, Claude Code)

ACHIEVEMENTS

- Specialist** on CodeForces, with a rating of **1501**. [🔗](#)
- Knight(Top 3.54%)** on Leetcode with a rating of **1953**. [🔗](#)
- 4 stars**, among top 1000 out of 181,000 Indian Programmers on **Codechef**. [🔗](#)
- Secured Global rank **1206** and **2081** among 20k+ participants in **Codeforces** Round 954 [🔗](#) and 951. [🔗](#)
- Secured Global Rank **774** [🔗](#), **1095** [🔗](#) among 25k+ participants in **Leetcode** Biweekly and Weekly Contests.
